

ANANYA SHAH

shah.anan@northeastern.edu | (551) 208-0271 | [LinkedIn](#) | [GitHub](#) | [Website](#)

Education

Northeastern University | Honors BS in Data Science & Finance, *Minor: Economics* *Sep 2020 – May 2025*
Coursework: Machine Learning (I & II), Natural Language Processing (HCI focus), Object-Oriented Design, Creating Business Value using AI, Data Science Foundations and Data Visualization, ML in Finance, Database Management & Large Scale Information Retrieval (RDBMS & AWS)

Work Experience

Data & Strategy Analyst | Cartesian Consulting Inc. *Sep 2024 - Jan 2025*
• Developed advanced SEO tools through web scraping and interactive dashboards *Boston, MA*
• Collaborated with technical stakeholders to distill complex narratives into compelling, boardroom-ready presentations
• Developed automated analytics workflows in Python to replace error-prone manual reports, reducing turnaround time by 30%

Managing Director | Huntington Angels Network (Student Organization) *Jan 2024 - Apr 2025*
• Led a team of 12+ students in connecting NEU entrepreneurs with capital resources *Boston, MA*
• Created an investor-founder matching algorithm, significantly streamlining venture engagement process
• Led strategic evaluations of startups, presenting due diligence and pitch feedback reports to founders

CTO & Founder (Venture Co-op) | FindHer *Dec 2022 - Nov 2023*
• Built a startup from "zero to one": wireframed flows in Figma, turned them into production code, and pitched 10+ VCs for pre-seed funding *Bangalore, IN*
• Recruited and led a 4-engineer squad; shipped MERN application, cutting release cycles by 25%
• Drove customer-discovery and outbound sales, converting the first three pilot clients

Business Development Analyst | Hercules Capital Inc. *July 2022 - Dec 2022*
• Conducted market research for new investment opportunities, sourcing and reaching out to potential portfolio companies *Palo Alto, CA*
• Analyzed Incomes Statements for portfolio management on proprietary software
• Built Excel-based automation which streamlined business development intake processes by 80%

Projects

Canvas-LinkedIn Profile Analyzer | Selenium, Transformers, Streamlit | [Github](#)
Built a tool that matches students into optimal teams by scraping Canvas rosters, discovering LinkedIn profiles, and computing compatibility scores and outputting top contenders for a group project.

Spend Analyzer | AWS Lambda, S3, RDS, EC2 | [Github](#)
Deployed a serverless finance app that processes bank statements into categorized transactions and visualizes spending insights through an AWS architecture with Lambda ETL, RDS storage, and Streamlit dashboard.

LoRA-Based Dialect Bias Mitigation | PyTorch, Hugging Face, NLP Fairness | [Paper](#)
Conducted research on proving covert racism in LLMs. Attempted to reduce bias by implementing Low-Rank Adaptation on LLaMA-3.

Skills & Interests

Languages: Python, Java, JavaScript/TypeScript, SQL; **Frameworks & ML:** PyTorch, TensorFlow, Scikit-learn, React/MERN, Streamlit; **Cloud & DevOps:** AWS (Lambda, EC2, RDS, S3, IAM), Docker, Git; **Data & Analytics:** Pandas, Tableau, Web Scraping; **Specialties:** NLP, CNN/LSTM time-series, SEO analytics, Executive data storytelling
Other: Climbing, Running, Thrifting, Learning to DJ!
